On: May 17, 2022 By:

Do you want to set up an online restaurant ordering website using WordPress? If so, you're certainly in the right post.

Ordering food online has become an extremely popular trend across the globe. There are a significant number of restaurants offering online services such as online ordering, online takeout, and online booking.

However, either you can create an online ordering system directly into your WordPress website or you can employ the help of third-party ordering service.

But, honestly speaking, instead of going with any third-party ordering service, making your own online restaurant ordering website with WordPress would be a better deal.

Throughout this article, we will show you how to set up an online ordering website for restaurants using WordPress.

Table of Contents

How to Set Up an Online Restaurant Ordering Website with WordPress

Thousands of people around the world are using WordPress to create multiple types of websites. It is the most popular content management system in the world.

Install WordPress and WooCommerce

When it comes to creating a website that allows you to order food online, WordPress has no equal. So, install WordPress into your device first.

If you're a total newbie to WordPress, see this guide on [how you can install WordPress easily](#) on your device.

As we all know, without having installed WooCommerce, making an e-commerce website is impossible.

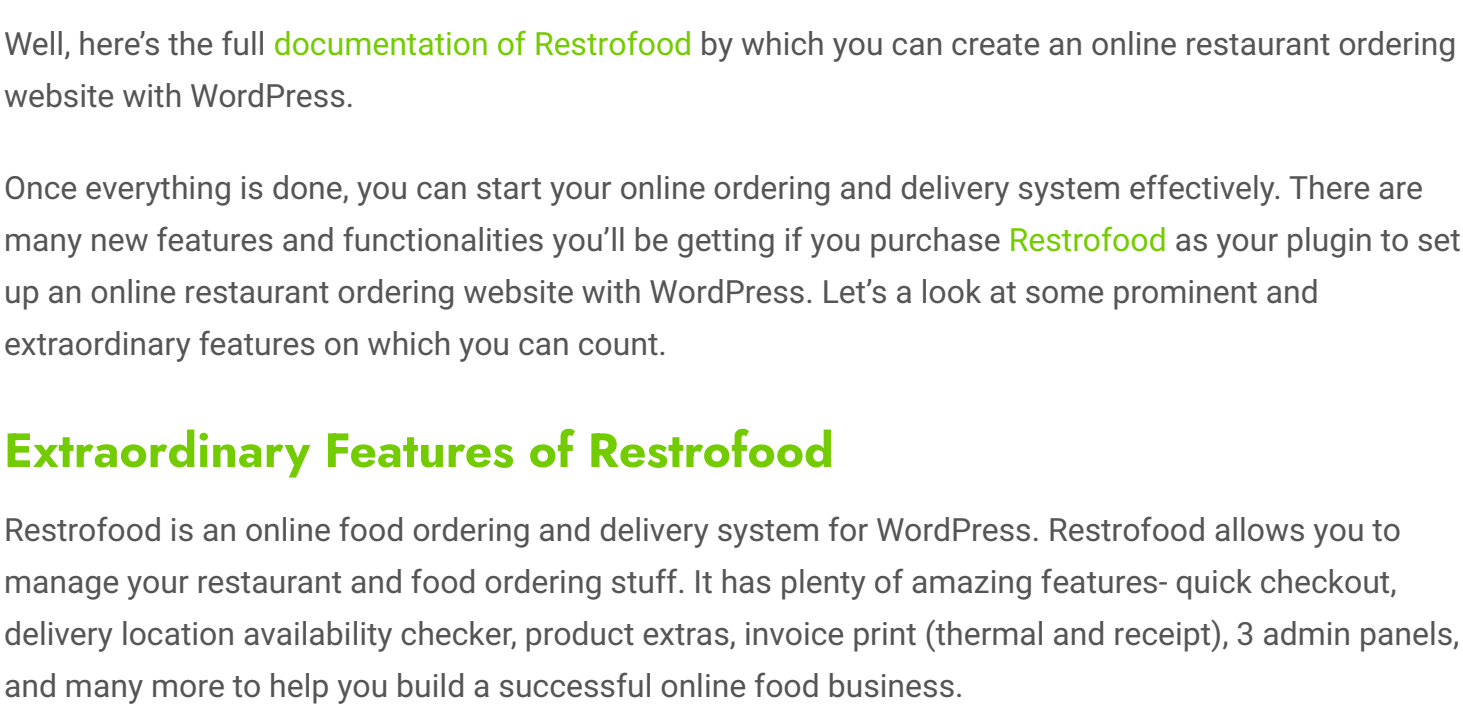

However, WordPress offers the free WooCommerce plugin, one of the most popular eCommerce platforms in the world. WooCommerce allows you to turn your WordPress site into an online store, complete with products, payments, and order management.

Creating all kinds of products is easy with this free plugin, as it is user-friendly and highly customizable. However, if you don't know how to set up WooCommerce on WordPress, then take a tour of [this guide](#) and you'll be able to complete things.

Now, you can use one of the WooCommerce compatible extensions to build an online ordering website for WordPress restaurant websites, or you can use a WordPress plugin that works independently with WooCommerce.

In this post, we're going to use Restrofood, an ultimate food ordering & delivery system plugin for WordPress.

Install and Set up an Online Restaurant Ordering Website System Plugin – Restrofood

In WordPress, installing a specialized plugin is the easiest way to create an online ordering system. The plugin will allow you to display the food items that you would like to offer for online delivery. Here is a simple explanation of how to set up an online ordering system.

Install and Activate Plugin- Restrofood

The WordPress repository offers many free plugins, as well as premium plugins. Like I said, we'll be using [Restrofood – Online Food Ordering & Delivery WordPress plugin](#) here.

Well, once you download the plugin zip file, you need to install it and activate the plugin. Take a look at the below documentation to see how you can install and activate the Restrofood plugin on your WordPress.

Documentation: <https://enteraddon.com/restrofood-demo/how-to-install-restrofood-wordpress-plugin/>

Import FREE Restrofood Theme with Demo Data

Moreover, if you wish to change the WordPress pre-installed theme, you can do so. Because Restrofood provides you with a theme with the plugin to make your e-commerce site more attractive than ever before.

However, the theme is included with the plugin. So, you don't need to bear any extra cost. Plus, you can add the demo data with just one click. So, click on the below documentation links to see the process.

Documentations:

Well, here's the full [documentation of Restrofood](#) by which you can create an online restaurant ordering website with WordPress.

Once everything is done, you can start your online ordering and delivery system effectively. There are many new features and functionalities you'll be getting if you purchase [Restrofood](#) as your plugin to set up an online restaurant ordering website with WordPress. Let's look at some prominent and extraordinary features on which you can count.

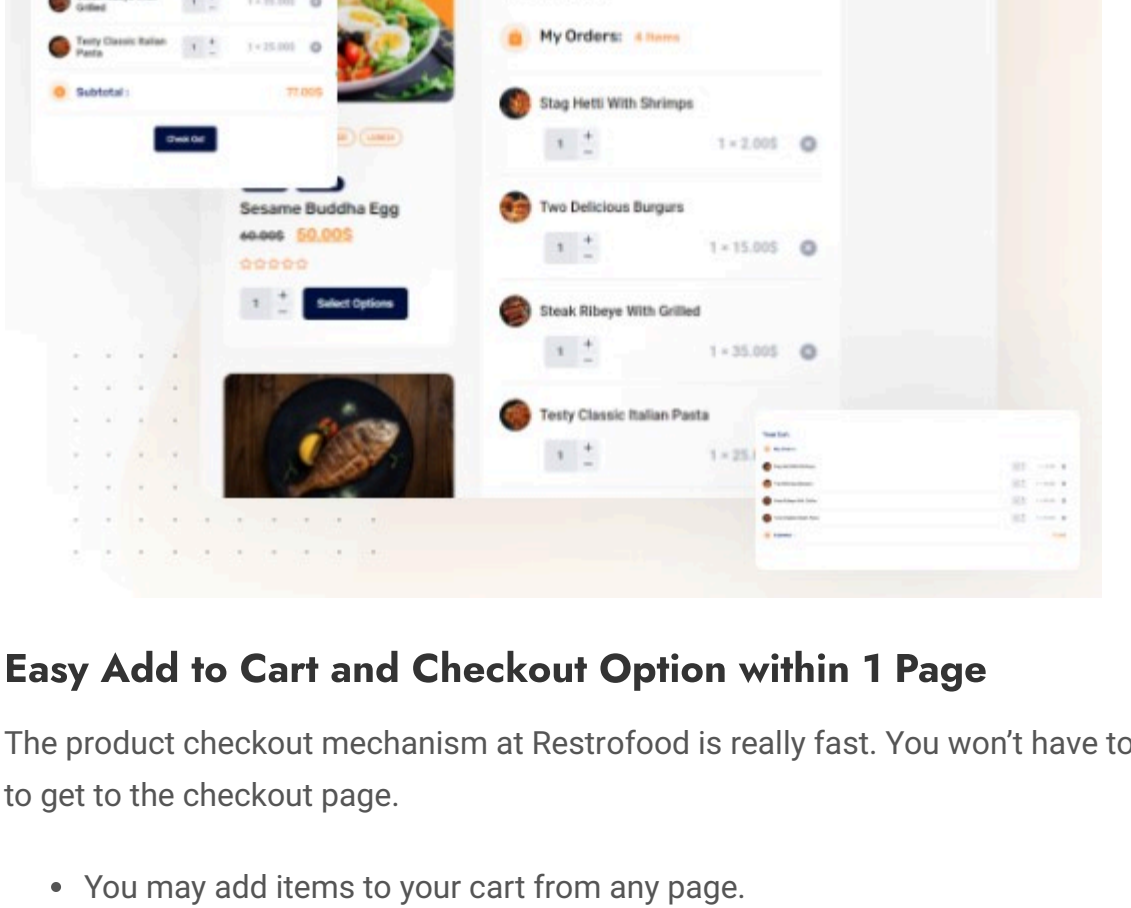

Extraordinary Features of Restrofood

Restrofood is an online food ordering and delivery system for WordPress. Restrofood allows you to manage your restaurant and food ordering stuff. It has plenty of amazing features- quick checkout, delivery location availability checker, product extras, invoice print (thermal and receipt), 3 admin panels, and many more to help you build a successful online food business.

Theme and Demo Data: One-click Importing

The Restrofood package contains a FREE Theme named "restrofoodtheme.zip" as well as demo data to create a website similar to our demo. Our clients do not need to purchase a separate theme. Using this theme instead of a built-in WordPress theme might be a better value.

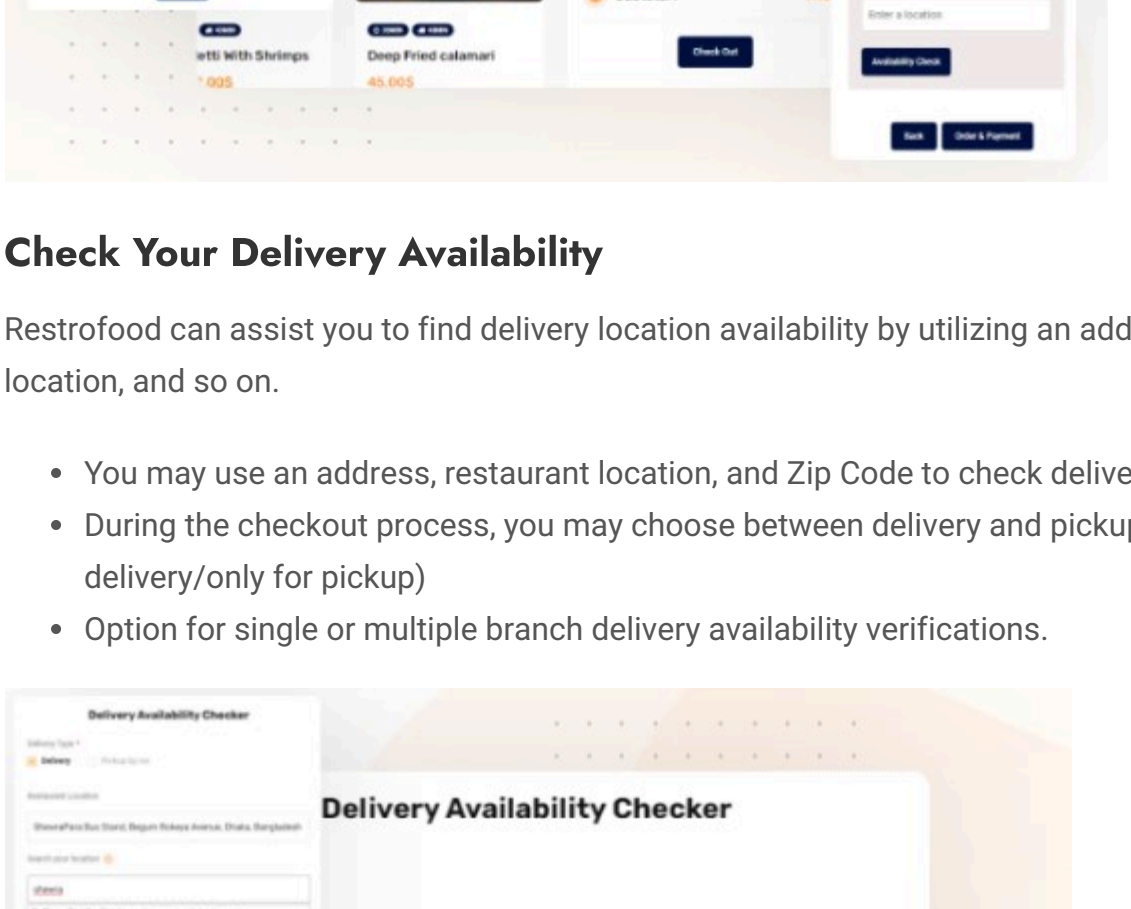

- The Elementor Page Builder allows for complete customization of the theme.
- It has a one-click demo import system.
- Responsiveness is top-notch with any device.

Get Several Products Layout Option

Restrofood provides you with six distinct types of product layouts to exhibit your items to your consumers in an appealing manner. The layouts improve the aesthetic of the page and attract visitors.

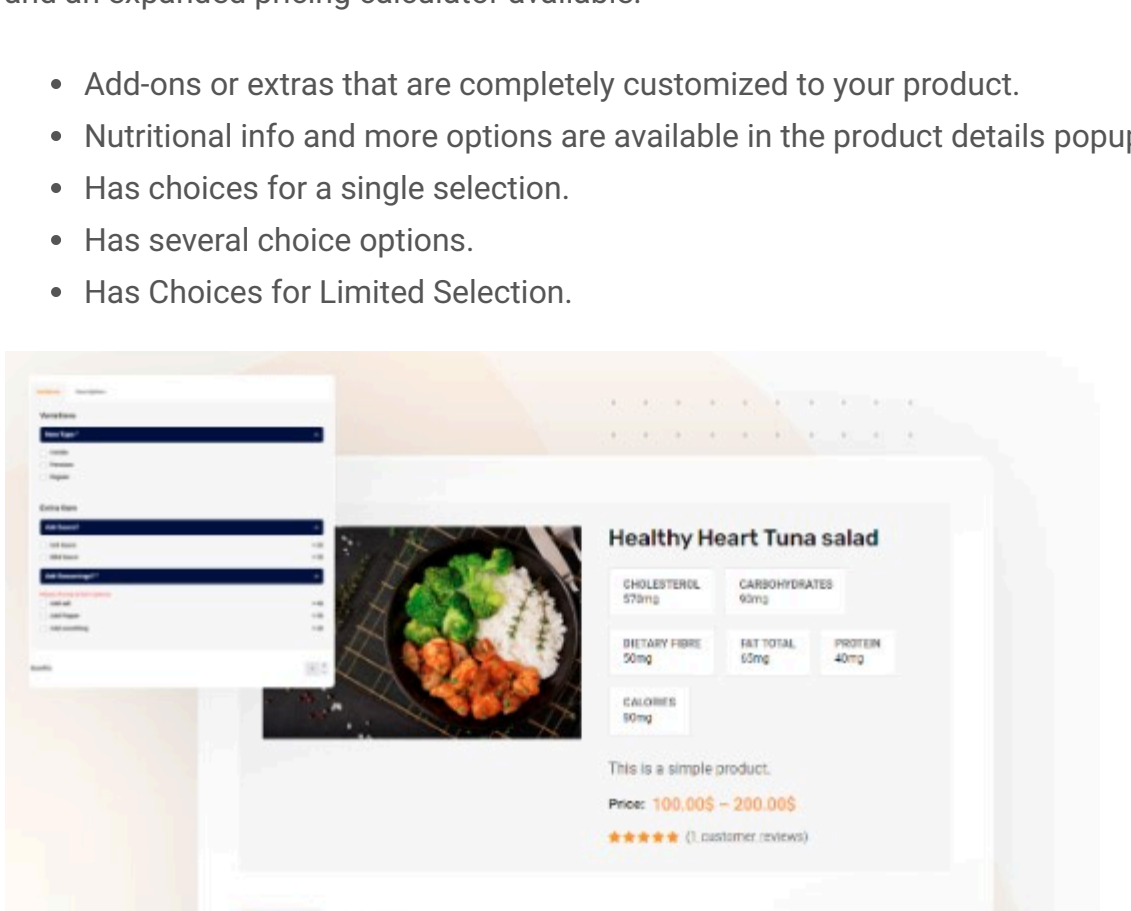

- Catches your customers'/shoppers' attention
- Easily showcase the most important features of your product.
- Clear and roomy so that all attention is drawn to the goods.

Versatile Cart Styling Availability

Restrofood offers three distinct cart styles. You can select the one you like most. It's simple to add items to your cart and place orders.

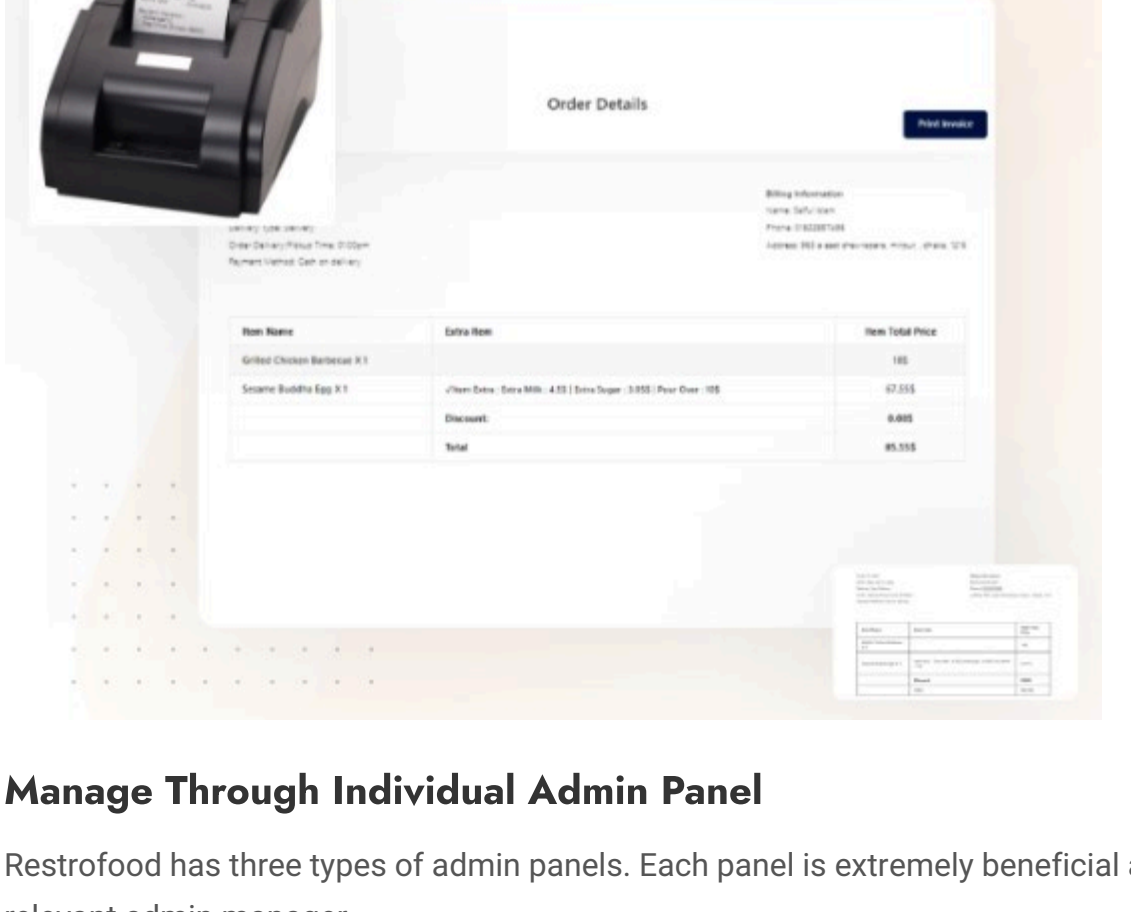

- A unique cart layout that effortlessly saves product information.
- A fantastic portal for order, catalog, and customer administration.
- It displays product data, categories, and site information to users.

Easy Add to Cart and Checkout Option within 1 Page

The product checkout mechanism at Restrofood is really fast. You won't have to click your mouse a lot to get to the checkout page.

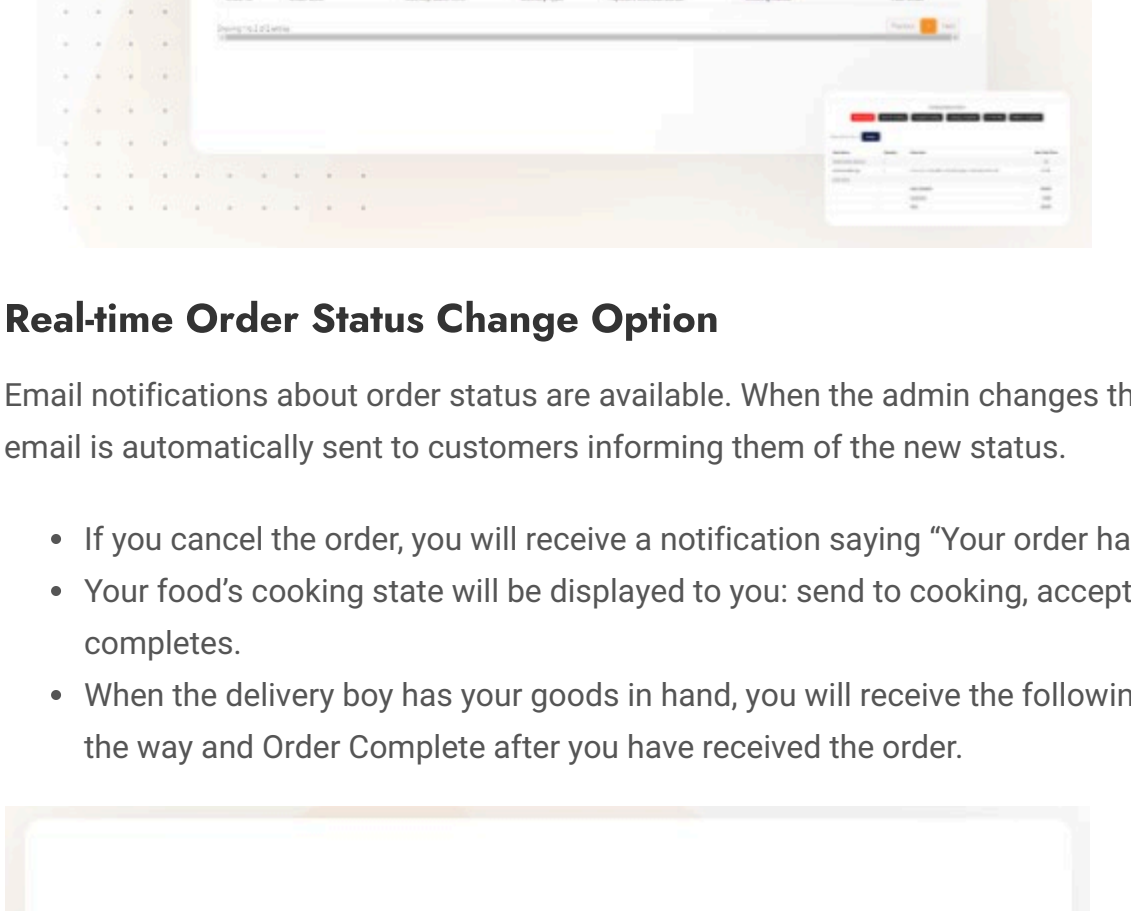

- You may add items to your cart from any page.
- Cart and checkout are both available from the same page.
- It is simple to place an order from the shop website.

Check Your Delivery Availability

Restrofood can assist you to find delivery location availability by utilizing an address, Zip Code, branch, location, and so on.

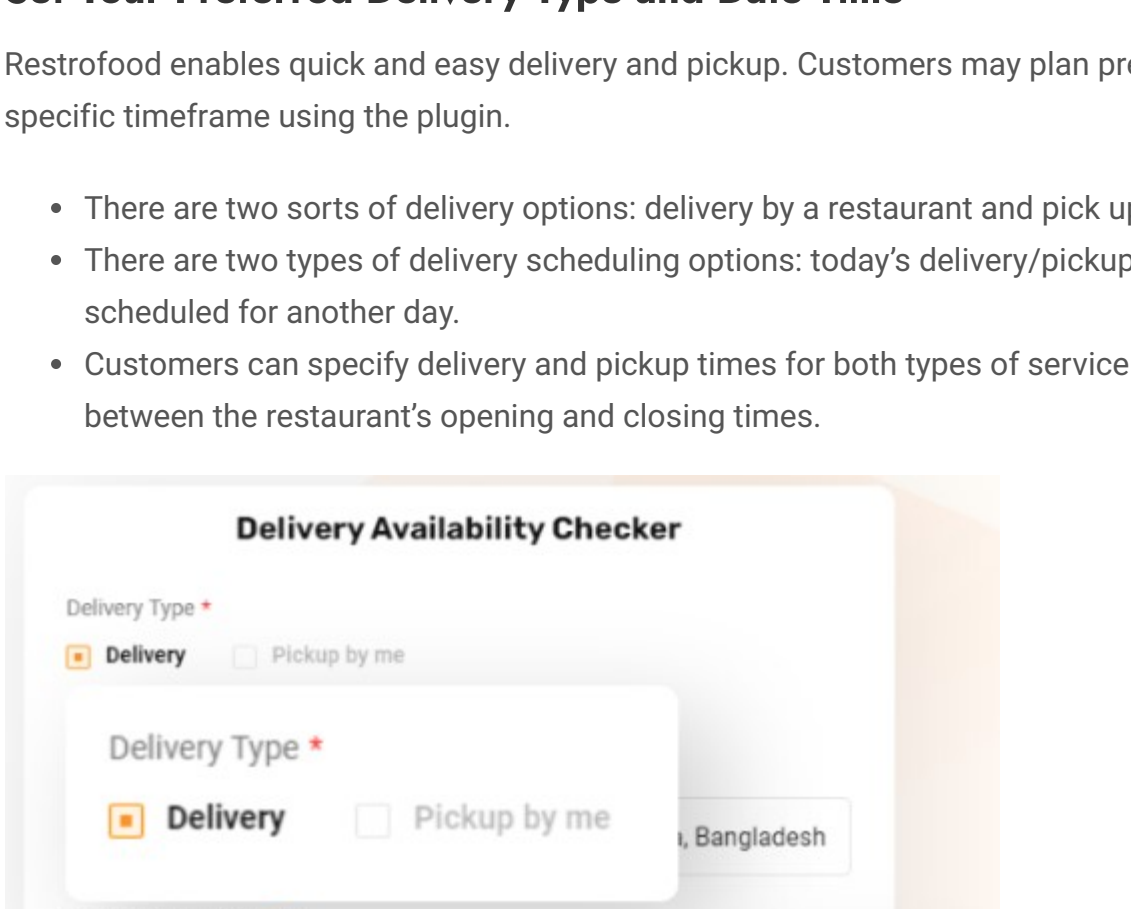

- You may use an address, restaurant location, and Zip Code to check delivery availability.
- During the checkout process, you may choose between delivery and pickup. (Only for delivery/only for pickup)
- Option for single or multiple branch delivery availability verifications.

Add Extra Product As You Wish

Create an endless number of combination goods with various product extra options and allow your clients to make their purchase and quickly view the extended pricing. There are other stylistic options and an expanded pricing calculator available.

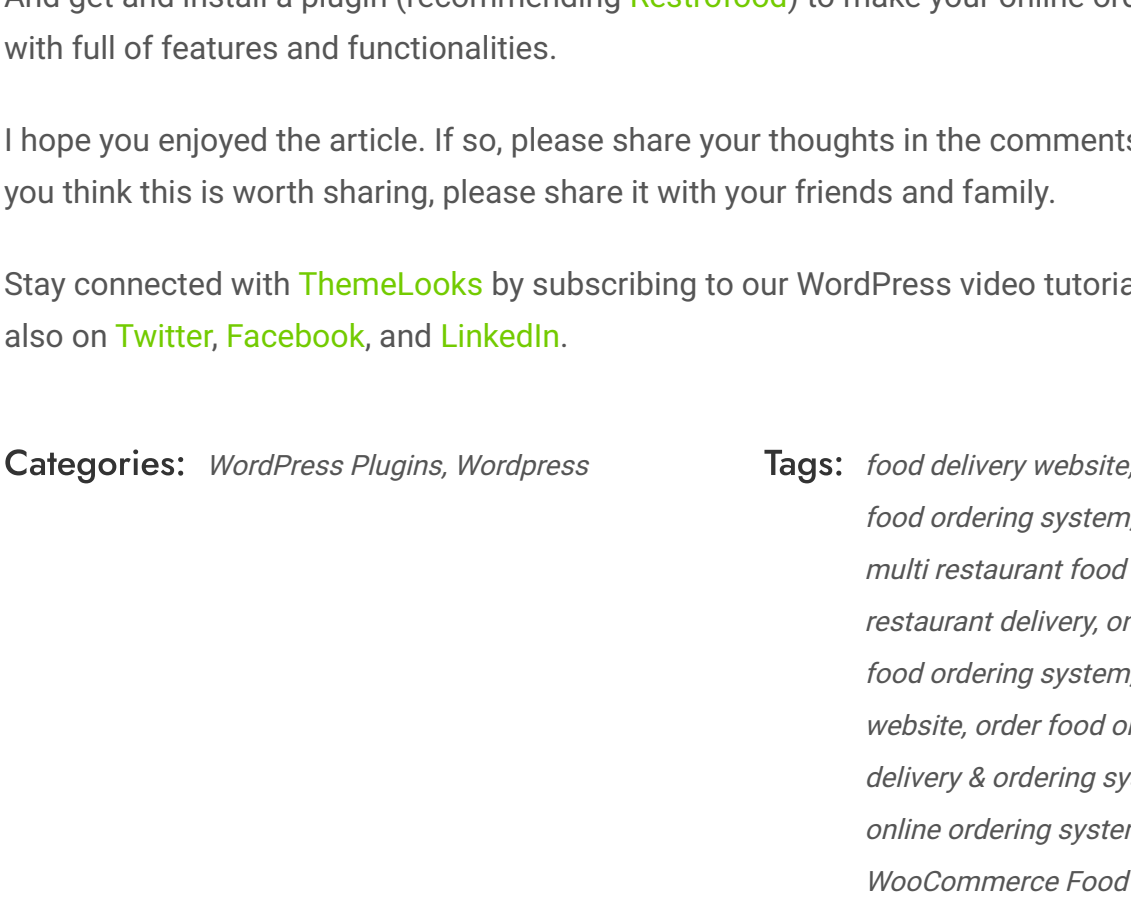

- Add-ons or extras that are completely customized to your product.
- Nutritional info and more options are available in the product details popup.
- Has choices for a single selection.
- Has several choice options.
- Has Choices for Limited Selection.

Printing Invoices Easier than Ever Before

Invoices are a must for any business. Restrofood makes it easy to manage your online food ordering business with order invoices. Super easy to print.

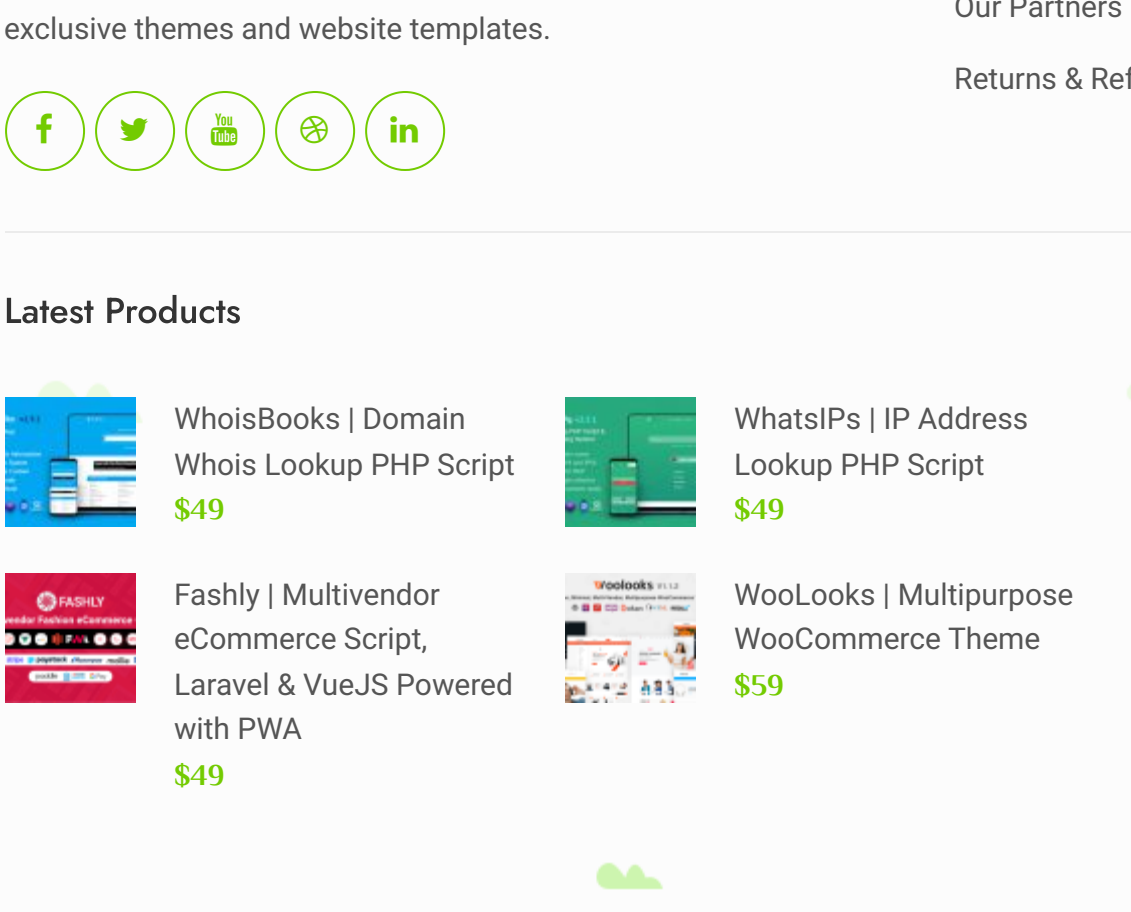

- Print Order easily with just a click.
- It is compatible with both thermal and receipt printers.
- The option to customize invoice headers and footers is provided.

Manage Through Individual Admin Panel

Restrofood has three types of admin panels. Each panel is extremely beneficial and efficient for the relevant admin manager.

- A Shop Manager admin panel.
- The Kitchen Manager's administrative panel.
- A Delivery Man administration panel.

Real-time Order Status Change Option

Email notifications about order status are available. When the admin changes the status of an order, an email is automatically sent to customers informing them of the new status.

- If you cancel the order, you will receive a notification saying "Your order has been canceled."
- Your food's cooking state will be displayed to you: send to cooking, accept cooking, and cooking completes.
- When the delivery boy has your goods in hand, you will receive the following order statuses: On the way and Order Complete after you have received the order.

Set Your Preferred Delivery Type and Date Time

Restrofood enables quick and easy delivery and pickup. Customers may place pre-orders within a specific timeframe using the plugin.

- There are two sorts of delivery options: delivery by a restaurant and pick up by me.
- There are two types of delivery scheduling options: today's delivery/pickup and delivery/pickup scheduled for another day.
- Customers can specify delivery and pickup times for both types of service. It only has to be between the restaurant's opening and closing times.

Delivery Availability Checker

These are some impeccable features that Restrofood has in its box. The pricing plan that Restrofood is offering would be a better deal than any other plugins out there.

Insights

To sum up, it's clear that setting up an online restaurant ordering website with WordPress is not a big task anymore. Follow the above guide to install WordPress and WooCommerce in your system.

And get of install a plugin (recommending [Restrofood](#)) to make your online ordering system attractive with full features and functionalities.

CLIENT FEEDBACK

Trusted by 1,000+ Clients

★★★★★
I am truly amazed by this script. It tightly integrates with WooCommerce and WordPress and boasts some impressive features that are normally associated with some of the biggest players in the market. Support is absolutely there for you, with quick response and an unusual and refreshing sense of care that you don't see very often these days. I'm looking forward to investing in this script with the confidence that we will both grow together.
